SoundEar A/S

FEATURE SHOWCASE

SoundEar Cloud

A quick tour of the cloud platform — from sign-up to standards-based noise reports.

GET YOUR TEAM IN

Self-service onboarding & social sign-in

01 Sign up in seconds

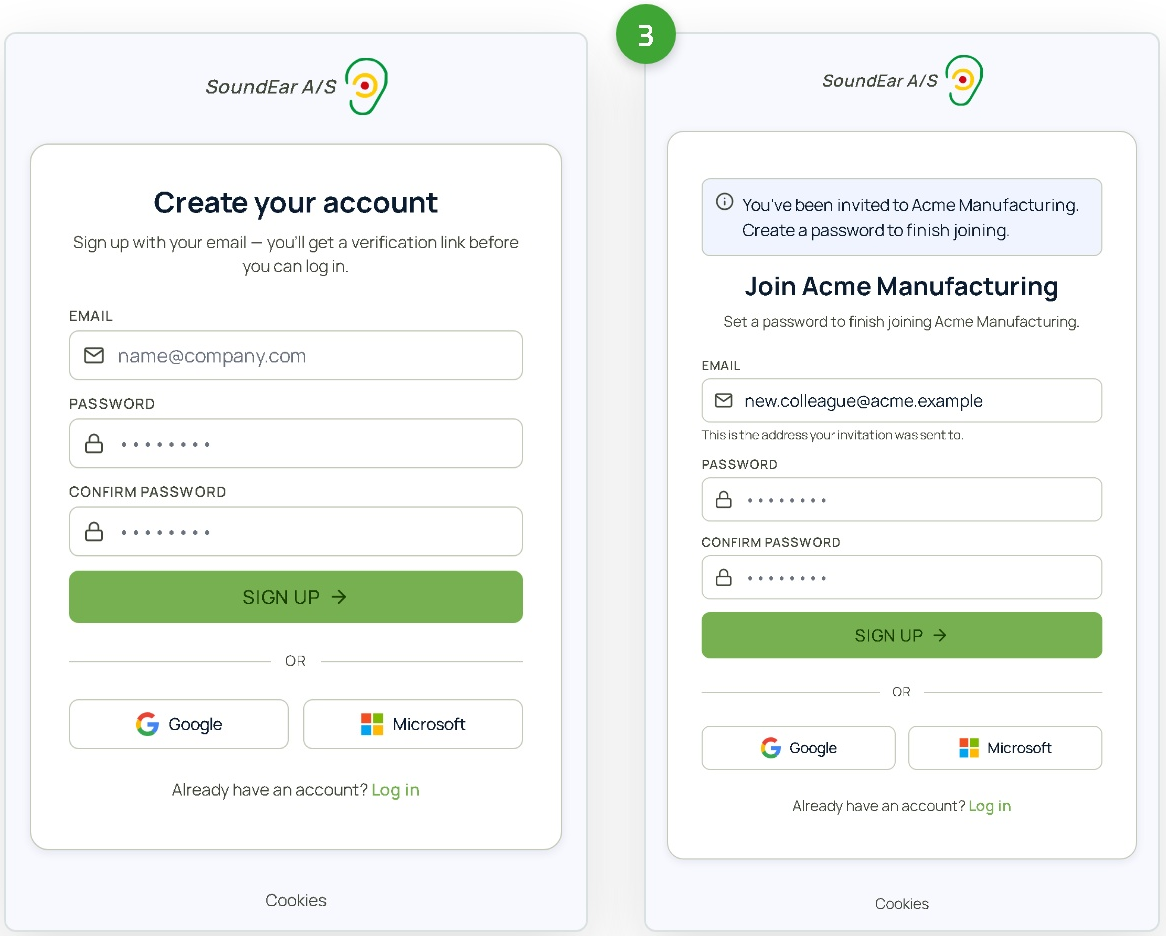

Email & password with built-in verification. No IT ticket, no waiting.

02 One-click SSO

Sign in with Microsoft or Google. Staff accounts are SSO-enforced.

03 Invite your colleagues

By email — they join your organisation with the right role and site access.

PLUG IN, OR PUSH OVER THE AIR

Onboard over USB — reconfigure remotely

01 Plug in over USB

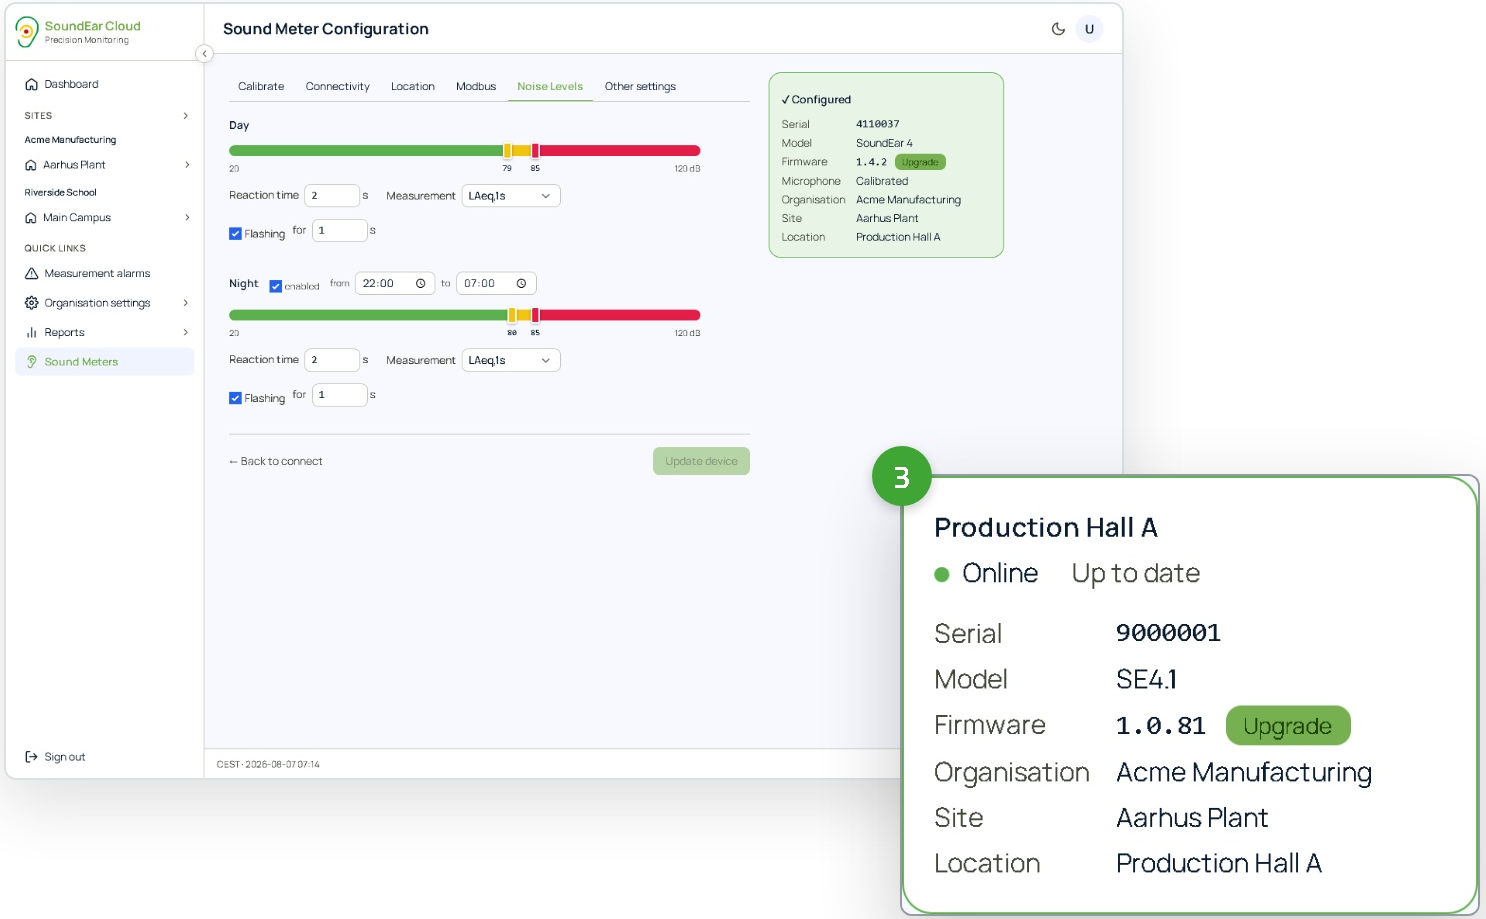

Connect via WebHID — the meter is auto-identified. Nothing to install.

02 Set day / night thresholds

Calibrate the microphone and push the configuration to the device.

03 Reconfigure SE4 meters remotely

No USB, no site visit: the device reconciles over the air and reports back **Online · Up to date**.

SEE EVERYTHING AT A GLANCE

Live dashboard with multi-layered alerts

01 At-a-glance KPIs

How many locations are live, and how many need attention right now.

02 Live streaming

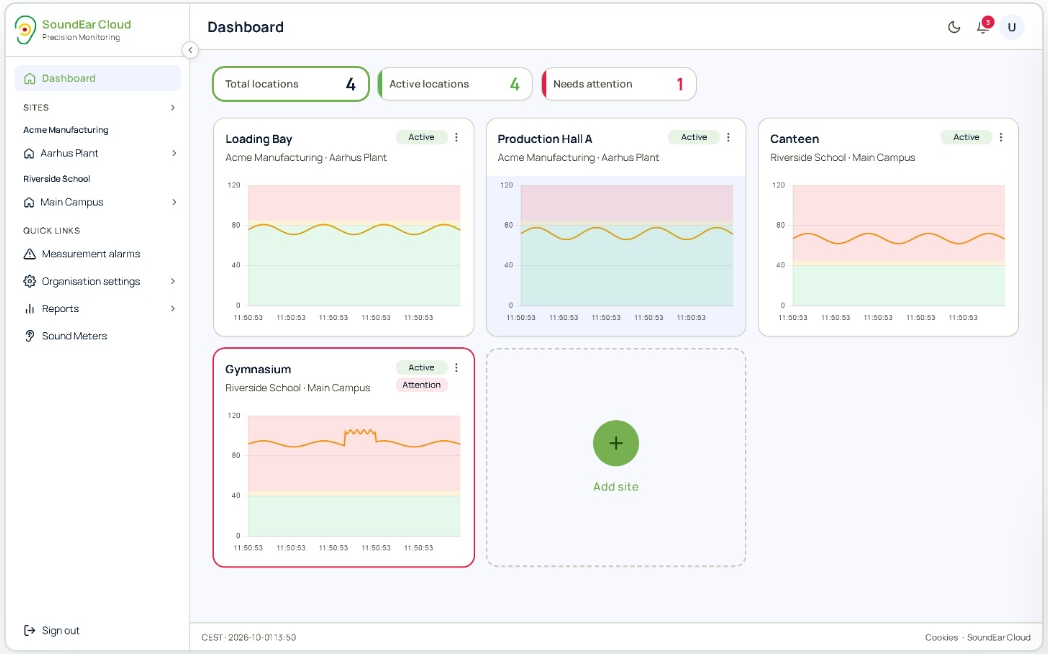

Every card streams live, with green / amber / red threshold bands.

03 Notification bell & push

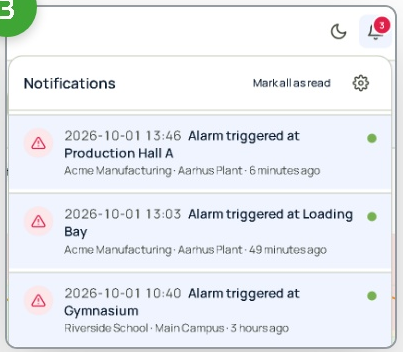

Alarms land under the bell and as push notifications on phone and desktop, even when SoundEar Cloud is closed.

04 Alerts on every layer

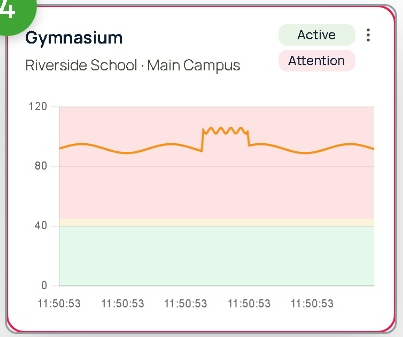

Noise-limit exceedances, threshold alarms and device-health flags.

NOISE ASSESSMENT, DONE FOR YOU

Standards-based noise assessment reports

01 Build in one click

Sections & limits are preselected from the location's assigned standard.

02 Per-day traffic-light assessment

Against EU, OSHA, WHO & HTM frameworks — with recommended-action cards.

03 Four environments

Industry · Hospital · Theatre · Live events.
